Proposed Solution for Freelance Finder :

S. No.	Parameter	Description
1	**Problem Statement**	Clients often find it hard to reach skilled freelancers quickly, and freelancers lack visibility or timely payments. Current platforms do not personalize recommendations or ensure accountability throughout the project.
2	**Idea / Solution Description**	Freelance Finder will serve as a streamlined platform where freelancers and clients can connect, collaborate, and complete work securely. It will focus on time-efficient job discovery, instant profile feedback, and trust-building features like work progress tracking.
3	**Novelty / Uniqueness**	- Skill-matching quiz for better job suggestions - Real-time progress tracker for clients - Voice messaging feature for mobile users - Instant shortlisting via AI proposal scoring - Weekly leaderboard for top freelancers
4	**Social Impact / Customer Satisfaction**	- Helps new freelancers build credibility through micro-gigs - Gives small businesses affordable access to global talent - Reduces ghosting via time-limited responses - Increases project completion rates with structured workflows
5	**Business Model**	- Basic free plan for users - Ads for skill training platforms or tools - Paid job boosts for clients - Subscription for freelancers with perks like early access to jobs and proposal analytics
6	**Scalability**	- Scalable backend using microservices - Easily extendable to mobile via PWA or React Native

		- Built-in support for regional languages and currencies
		- APIs available for HR software integrations in Phase-II
